Test Sieve Shaker

- Standard split screen (also known as experimental sieve and test sieve) is a standard analysis sieve of particle grading and liquid filtration.
- It is applied to the laboratory and quality control room, and the analysis of the grain size structure and the content of liquid solids are analyzed, and the characteristics of low noise, high efficiency and high.

Technical Parameters

Model	DTS200
Max. Sieve Level	8
Sieve Diameter	Φ200mm
Granularity	0.001-20mm
Input Quantity	≤ 200 g
Amplitude Range	≤ 5mm
Voltage	220V /50HZ
Motor Speed	1400rpm
Motor Power	120W
Dimensions	450*450*450mm
Weight	40kg
